*** General notes:**

Water hazard class 1 (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

*** Results of PBT and vPvB assessment**

*** PBT:** Not applicable.

*** vPvB:** Not applicable.

*** Other adverse effects** No further relevant information available.

13 Disposal considerations

*** Waste treatment methods**

*** Recommendation:**

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

*** Uncleaned packagings:**

*** Recommendation:** Disposal must be made according to official regulations.

*** Recommended cleansing agent:** Water, if necessary with cleansing agents.
