Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

*** Material of gloves**

Material : butyl rubber + nitrile

Thickness of the glove : ≥ 0.7 mmPenetration time : ≥ 480 min

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

*** Penetration time of glove material**

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

* **Toxicity*** **Aquatic toxicity:** No further relevant information available.* **Persistence and degradability** No further relevant information available.* **Behavior in environmental systems:*** **Bioaccumulative potential** No further relevant information available.* **Mobility in soil** No further relevant information available.* **Additional ecological information:*** **General notes:**

Water hazard class 1 (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

* **Results of PBT and vPvB assessment*** **PBT:** Not applicable.* **vPvB:** Not applicable.* **Other adverse effects** No further relevant information available.

13 Disposal considerations

* **Waste treatment methods*** **Recommendation:**

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

* **Uncleaned packagings:*** **Recommendation:** Disposal must be made according to official regulations.* **Recommended cleansing agent:** Water, if necessary with cleansing agents.
